

Key Points to be Discussed during Tides - Internal tides – HF Splinter - Discussions

Jason-3 Extension of Life

- Continue an interleaved orbit (as per usual)

Internal tides

- we recommend an internal tide model for use by the community (e.g., in CMEMS processing, in RADS, etc.) : Ed Zaron model

Discussions for each splinter are organized at the end of each session.
Plenary discussion and recommendations will take place on Friday afternoon.
